 5. Maksimalna debljina dušeka ne sme da bude veća od 120 mm
 6. Širina i dužina dušeka treba da bude takva da razmak između dušeka i kreveta nije veći od 30 mm.
 7. Svi montažni elementi moraju uvek biti dobro zategnuti i svi elementi se moraju redovno proveravati i doteravati po potrebi.
 8. Održavati vlažnom krpom, bez korišćenja abrazivnih sredstava.
9. **OBAVEŠTENJE O SPREČAVANJU POVREDA: Kada dete postane sposobno da se samo penje uz krevetac, krevetac više nije bezbedan za upotrebu!**
